

Oneota Slopes Sustainably Grown

Christmas Trees

◆ Regionally Grown

Pat and Paul Johnson and Andy, Emily,

Helen, Leila and Elsa Johnson (Helen and Leila pictured at left) are two generations (three with the girls) of tree farmers. Our farm, Oneota Slopes, is located 8 miles northeast of Decorah, Iowa. We have been growing trees, cows, sheep, and chickens, gardening, dairying (until 1990), managing woodland, and attempting to farm sustainably for 30 years.

◆ Fresh

We harvest during the few days before delivery (usually 2-4), and do not paint our trees green. Maintained in water, they should remain fresh, green, and aromatic throughout the holiday season.

◆ White Pine

◆ Scotch Pine

◆ Affordable

◆ All Shapes and Sizes

◆ Sustainably Grown

Unlike the vast majority of tree farms, we do not spray our trees with pesticides or spray the plantation with herbicides. We actively manage for habitat, and believe the rewards of having cedar waxwings and prairie rose calling our tree farm home far outweigh the added costs and management challenges involved.

Fresh, sustainably grown trees at an affordable price.

From small table-tops to 8-foot beauties, wide or narrow, dense or more open, we have a wide selection of trees.

Oneota Slopes is also a choose 'n cut operation. Located near Decorah in NE Iowa, we can be reached at (563) 382-0537, or trees@oneotaslopes.com
